OAKSHADE AI

Transforming ideas into digital reality

SELECTED WORK · 11 PROJECTS · 7 SECTORS

01 WHO WE ARE

One team, from strategy to shipped product.

Oakshade AI is a product studio that designs and builds websites, mobile apps, and AI-powered platforms — from the first conversation through launch and everything after it.

We work with founders, business owners, and operations leads who want a partner that owns the whole picture: strategy, design, engineering, and the long tail of support once a product is live.

One team carries a project end to end. There are no handoffs between agencies, no gaps where things get lost — and no wondering where your project stands.

One team, end to end

Strategy to launch under one roof — the people who plan it are the people who build it.

We stay on after launch

Monitoring, fixes, and a roadmap for what's next — the work doesn't stop at launch day.

Progress you can see

Clients log in to our own CRM to watch their project move in real time — no status-chasing.

02 WHAT WE DO

Six things we do well

A studio's worth of capability, kept deliberately small so the same team can carry a product from idea to launch.

01 Digital Transformation & IT Consultation

Modernise, automate, and scale.

Rethinking legacy systems and processes and mapping a pragmatic roadmap that turns technology into a growth engine.

technology & security audits · cloud & infrastructure strategy · workflow & process automation · legacy system modernisation · data & analytics enablement · fractional CTO / IT advisory

02 Mobile App Development *iOS, Android & cross-platform.*

Native and cross-platform apps engineered for performance, delightful UX, and effortless scale across every device.

native iOS (Swift) & Android (Kotlin) · cross-platform (React Native, Flutter) · offline-first architecture · push notifications & deep linking · app store optimisation & release · analytics, monitoring & maintenance

03 Website Development *Fast, modern, conversion-ready.*

High-performance marketing sites and web apps built with modern frameworks, optimised for speed, SEO, and conversion.

marketing & landing pages · full-stack web applications · headless CMS integration · SEO & Core Web Vitals tuning · e-commerce experiences · accessibility (WCAG) compliance

04 AI & Machine Learning *Intelligent products & automation.*

From LLM-powered features to custom models — AI that solves real problems rather than chasing the hype.

LLM & generative AI features · retrieval-augmented generation (RAG) · custom model training & fine-tuning · computer vision & NLP · data pipelines · evaluation, guardrails & MLOps

05 Cloud & DevOps Solutions *Reliable, scalable infrastructure.*

Architecting and automating cloud infrastructure so teams ship faster with confidence — resilient, secure, and cost-aware.

cloud architecture (AWS / GCP / Azure) · infrastructure-as-code (Terraform) · CI/CD automation · Kubernetes & containerisation · observability & incident response · cost optimisation & FinOps

06 Product Design *UX, UI & design systems.*

Research-driven design that turns complex problems into intuitive, beautiful, cohesive experiences.

UX research & discovery · information architecture · UI design & visual identity · interactive prototyping · usability testing · design systems & handoff

Every one of these is delivered by the same team — no handoffs.

03 HOW WE WORK

Six steps, start to support

You see working software every week — not just status updates — and you're in the room for every decision that shapes it.

01 Discover

We start with your goals, users, and constraints — then agree on what success actually looks like.

02 Design

Wireframes to polished UI, so you can see and react to the product long before a line of code is written.

03 Build

Development in short, visible cycles on a modern stack — you see working software every week, not just status updates.

04 Test

Real-device testing, performance and accessibility checks, and your own review round before anything goes near production.

05 Launch

Deployment, domains, analytics, and app store submission handled end to end — a launch day without surprises.

06 Support

We stay on after launch: monitoring, fixes, and a roadmap for the next set of improvements.

04 SELECTED WORK

The work.

Eleven products across seven sectors — real, live, and linkable. Four flagships get a page each; the rest follow.

01	Platinum Township	REAL ESTATE
02	Oakshade CRM	INTERNAL TOOLING
03	The Jagirdars	TRAVEL & HOSPITALITY
04	Medhya Design Studio	ARCHITECTURE & INTERIORS
05	SehatBuddy	HEALTHCARE
06	Kayo Physio	HEALTHCARE
07	Complete Waterproofing Systems	CONSTRUCTION
08	Qintara Living	HOSPITALITY
09	Aum Tourism	TRAVEL
10	Tour My Holiday	TRAVEL
11	The Real Jungle Project	ECO-TOURISM

FLAGSHIP · 01

IN DEVELOPMENT & TESTING

Platinum Township

Real-time 3D plot visualiser · Real estate

A 3D visualisation tool built for Platinum Township so prospective buyers can explore the development and visualise their own plot in real time. An immersive virtual walkthrough with 360° panoramic views and interactive scene exploration — buyers tour the township and see exactly what they're buying before a brick is laid.

LIVE AT

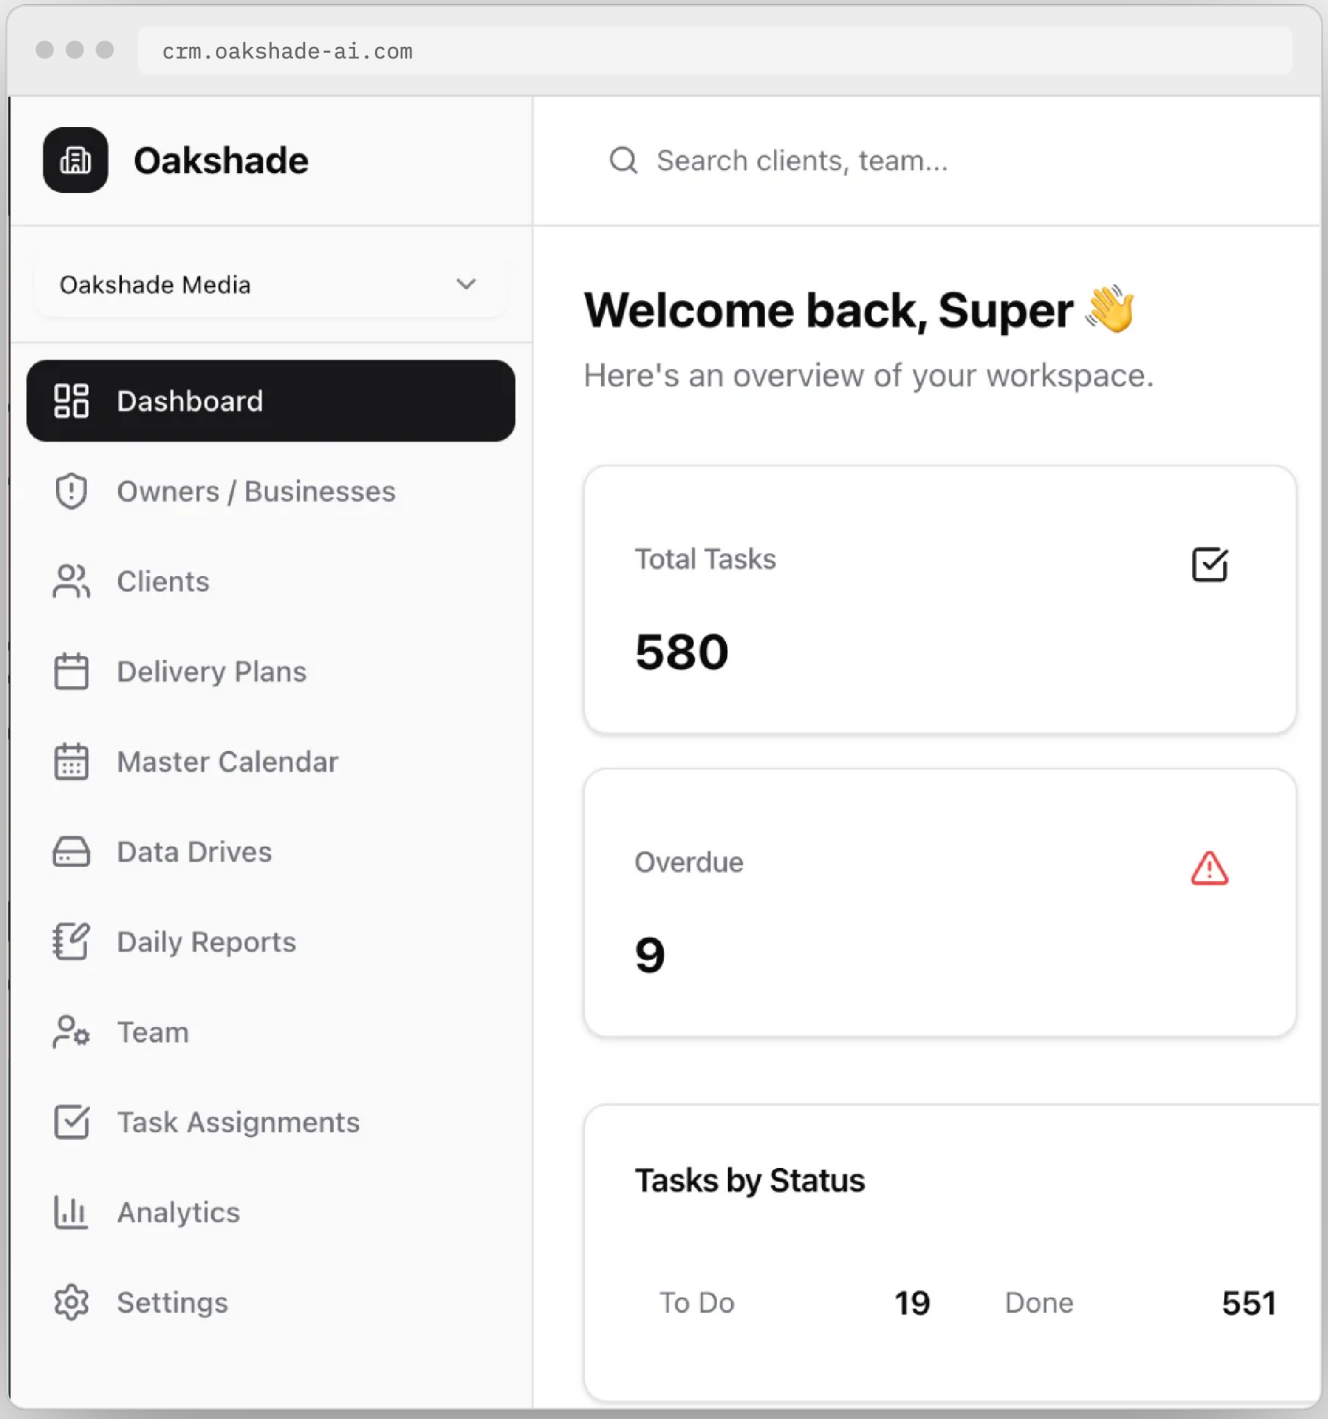

https://platinum-township.vercel.app/

FLAGSHIP · 02

INTERNAL TOOL / SAAS

Oakshade CRM

Internal operations & client-visibility platform

Our own CRM, built in-house and used daily by Oakshade employees and admins to track tasks, teams, and clients. Its second half is client-facing: clients log in to see the real-time progress of their own project. It's the system that runs our studio — and the reason our clients never have to ask "where are we on this?"

LIVE AT

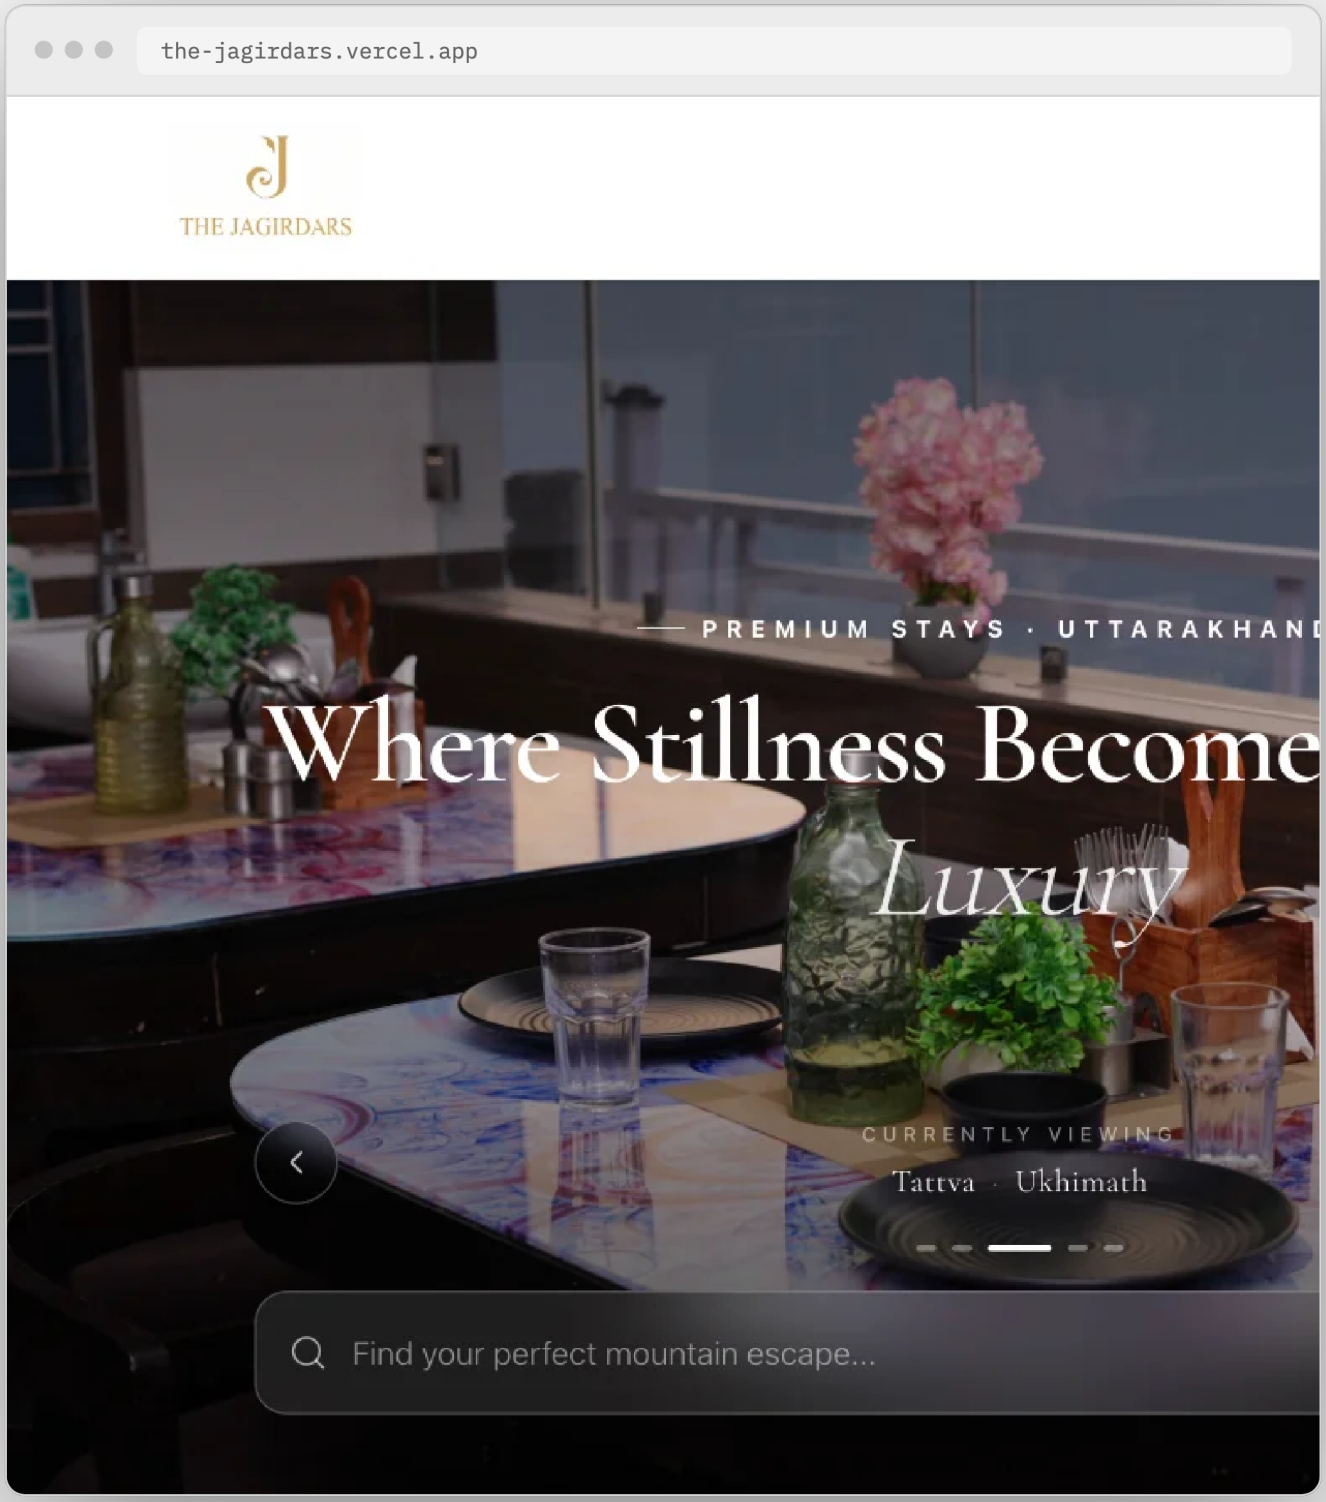

https://crm.oakshade-ai.com/

FLAGSHIP · 03

IN DEVELOPMENT & TESTING

The Jagirdars

A holistic yatra ecosystem · Travel & hospitality

A digital home for a collection of premium heritage homestays and retreats in Uttarakhand. Curated properties and Yatra Excellence Services presented as one unhurried, premium experience.

LIVE AT

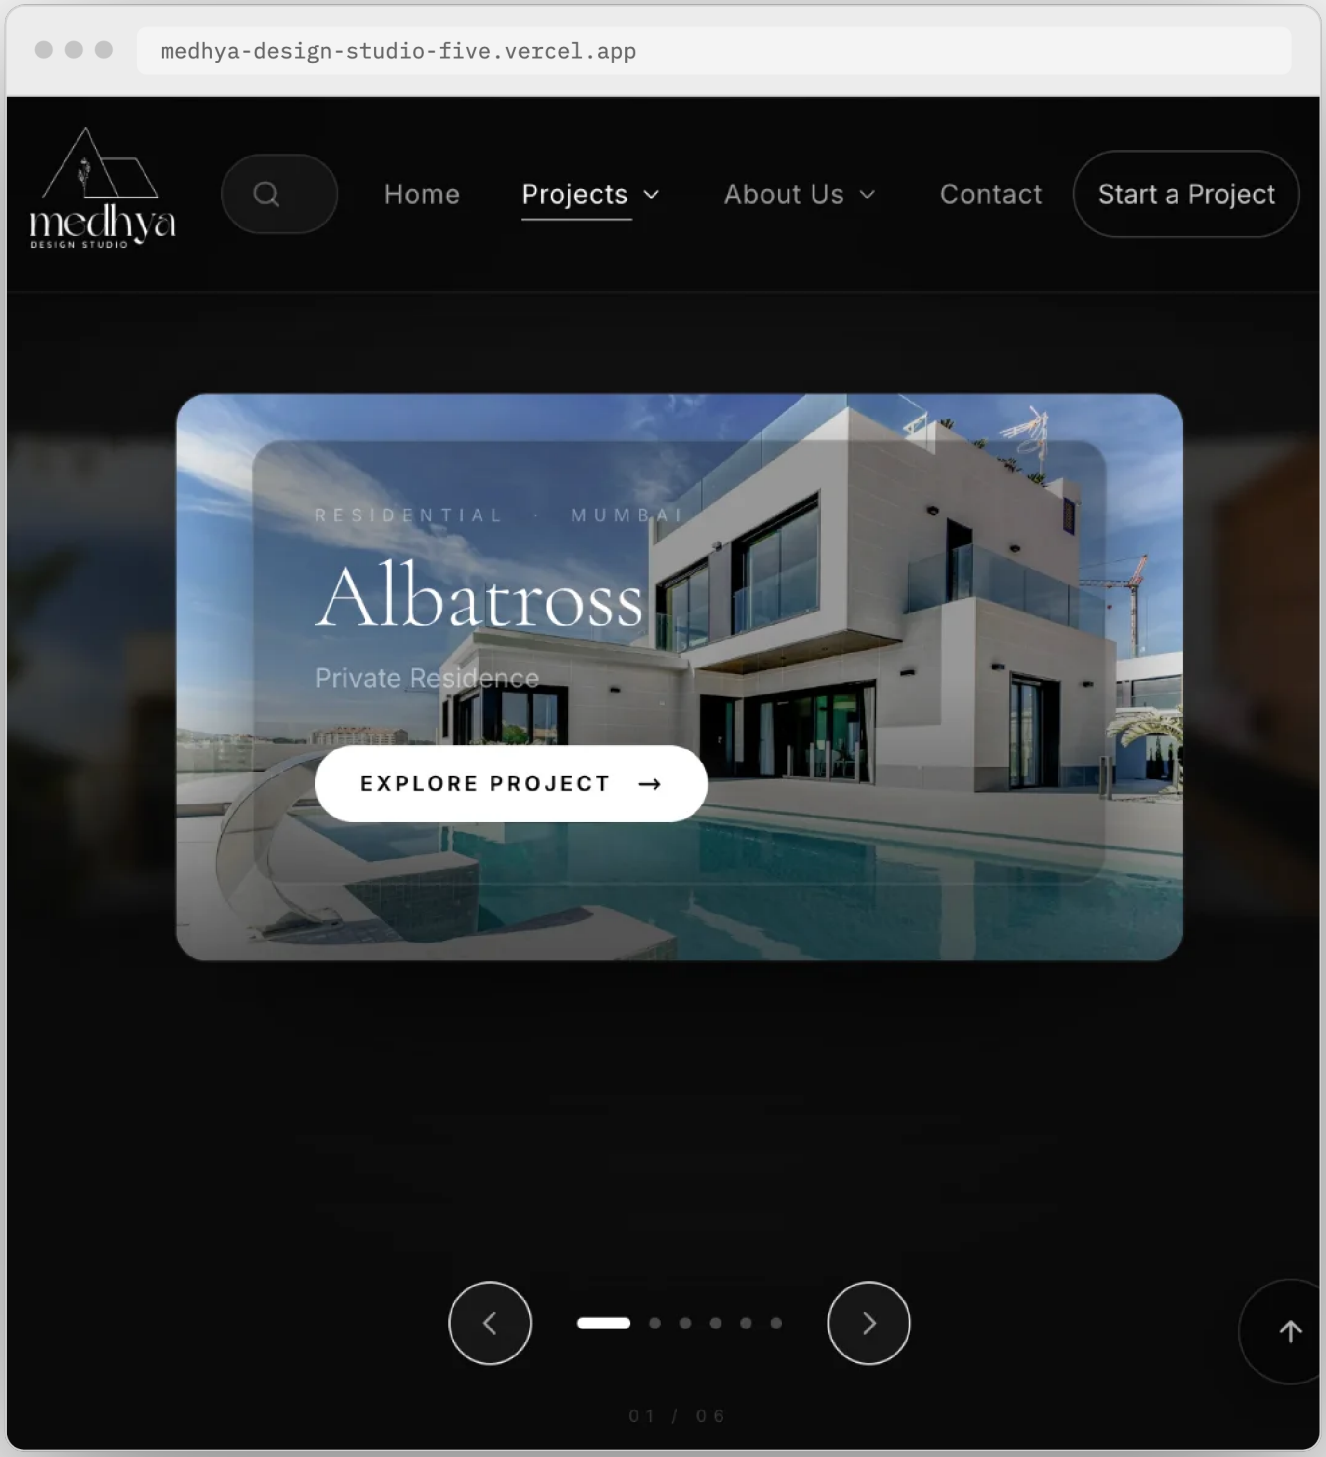

https://the-jagirdars.vercel.app/

FLAGSHIP · 04

IN DEVELOPMENT & TESTING

Medhya Design Studio

Architecture & interiors portfolio

Built for Medhya Design Studio, a team of architects and interior designers doing genuinely cool work. A multidisciplinary practice spanning residential, commercial, hospitality, and cultural projects — so the site had to get out of the way and let the work carry the page.

LIVE AT

https://medhya-design-studio-five.vercel.app/

05 MORE WORK

Web & mobile

SehatBuddy LIVE · WEB + MOBILE

HEALTHCARE

A healthcare companion that brings appointments, records, and day-to-day health tracking into one simple experience across web and mobile. Also on the Play Store and the App Store.

https://www.sehatbuddy.in/

Kayo Physio IN DEVELOPMENT & TESTING

HEALTHCARE · MOBILE APP + WEB APP

A physiotherapy platform pairing a patient-facing app with a web app for clinics — bookings, guided exercise plans, and progress tracking between sessions.

https://kayo-physio.vercel.app/

Complete Waterproofing Systems LIVE

CONSTRUCTION SERVICES

A clear, credibility-first website for a waterproofing contractor — services, past projects, and enquiries structured so prospective clients can get in touch in a couple of taps.

https://completewaterproofingsystems.in/

05 MORE WORK · CONTINUED

Travel & hospitality

Qintara Living LIVE

HOSPITALITY

A hospitality brand site for a premium stay experience — rooms, amenities, and enquiries with the polish guests expect before they book.

https://www.qintaraliving.com/

Aum Tourism LIVE

TRAVEL

A tour operator site that turns packages, itineraries, and destinations into something travellers can browse and enquire about in minutes.

https://aumtourism.in/

Tour My Holiday LIVE

TRAVEL

A holiday planning experience built around discovery — curated trips and destination pages that guide visitors from browsing to a booking enquiry.

https://tourmyholiday.netlify.app/

The Real Jungle Project IN DEV & TESTING

ECO-TOURISM

A site for an eco-tourism retreat, leaning on immersive photography and an unhurried layout to sell the experience of the place itself.

https://the-real-jungle-project.vercel.app/
